Impact Week 2022 | EVPA Annual Conference

1-2 December | Maison de la Poste | Brussels

Friday | 2 December

Accelerate Impact

To accelerate positive change for people and planet, we need to get the right people in the room and weave new webs of change. Impact Week brings changemakers together to mobilise capital for true social transformation.

We'll share fresh ideas that can enable net-zero economy, ease inequalities and elevate economic and social prospects for all.

We'll draw connections that will accelerate and scale up solutions.

And together we'll create those 'aha!' moments that can speed up an organisation's journey from theory to outcomes.

Come join us in Brussels, where surrealism reigns and every challenge is met with humour and irony!

EVPA Annual Conference is the premier event for the investing for impact community in Europe. Launched in 2004, it is THE place for our global network impact champions to encounter cutting-edge ideas, discover new trends, and engage with partners, old and new, to maximise their impact for people and the planet.

In 2022 we go further to build more impact and more synergies with an extended format and new audiences: the **Impact Week**.
